

5100 Series
Replacement Windows

Exceptionally beautiful,
energy-efficient windows
that will make your home
a lot more comfortable.

Gorell[®]
WINDOWS & DOORS

Gorell 5100 Series Windows Provide Improved Comfort and Superior Energy Efficiency.

CURB RISING HOME ENERGY COSTS.

Gorell 5100 Series windows will help keep your energy bills low because of their outstanding insulating properties. They are airtight when you close them. This eliminates uncomfortable drafts in cold weather and helps to maintain constant temperatures throughout your home for a healthier and more comfortable living environment.

PROTECT YOUR HOME AGAINST INTRUSION.

We design our products to provide excellent protection at your home's most vulnerable entry points—your windows. Every 5100 Series window model submitted for forced-entry tests has passed, meeting the highest level of structural forced-entry criteria to ensure maximum resistance against intrusion.

SPEND LESS TIME ON CLEANING AND MAINTENANCE.

5100 Series windows are built so durably that they require practically no maintenance. You'll find that they'll operate as smoothly decades from now as they did the day they were installed. Plus, cleaning windows was never so easy.

Gorell—Exclusive window partner with the National Crime Prevention Council, offering intruder-resistant windows and doors.

National ENERGY STAR® Partner of the Year every year since 2004.

Gorell 5100 Series double-hung windows are Green Seal™ certified.

Standard Features of 5100 Series Windows

- 1. Robotically sealed corners ensure the window stays square and will never require sealants. They also will prevent water and air from entering your home.
- 2. Expertly engineered, durable vinyl frame with multiple structural hollows provides exceptional strength and insulating properties.
- 3. Unique ventilation limit latches allow you to let in refreshing breezes without sacrificing safety and security.
- 4. Gorell's "Constant Force" balance system on double-hung models lets you operate your windows with just the touch of a finger.*
- 5. Premium-grade multi-fin weather seals create an airtight seal.
- 6. Easy-pull tilt latches on double-hung models provide "tilt in" operation on both sashes for unbelievably easy cleaning.
- 7. The Intercept® warm-edge spacer system is time-proven for long-term seal dependability and exceptional thermal performance.*
- 8. Almond (optional) or soft white vinyl frames feature a silky smooth, clean surface that will look beautiful for decades.
- 9. Insulating foam wrap creates another barrier to eliminate drafts coming up through your home's wall cavities.
- 10. Classic millwork design provides an elegant look typically associated with handcrafted moldings.

5100 SERIES SLIDING WINDOWS

Available in various configurations, including three-lite models, these windows feature lift-out sashes to allow for easier cleaning.

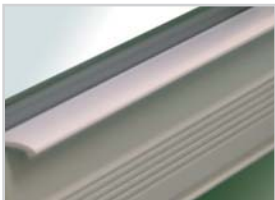

Heavy-duty, non-corrosive brass rollers allow 5100 sliding models to glide smoothly, as if on a cushion of air.

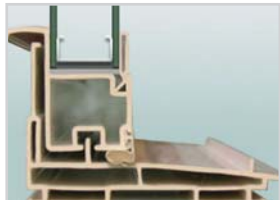

11. Heavy-duty, custom-designed hardware gives your windows vise-like strength and security, yet it's recessed into the sash so that it's practically invisible—giving your home an even more beautiful appearance.

12. Rugged, heavy-duty integral lift rail is indestructible and is built to stand up to regular, everyday use. This attractive feature makes the window easy to operate.

13. New, heavy-duty one-piece sloped sill design provides exceptional strength and rigidity. The bottom sash actually latches onto the sill, providing a super-tight seal. You can also choose our integral pocket sill design.

* Features not visible in photograph because of their location inside window frame.

HIGH-PERFORMANCE GLASS SYSTEMS

Gorell offers several unique high-performance Low-E glass systems that are designed to provide precisely the level of comfort, thermal performance, security, sound deadening and UV protection you deserve. Practically all 5100 Series windows that incorporate one of these glass systems qualify for the ENERGY STAR® label.

DECORATIVE GLASS

5100 Series windows with beautiful stained and leaded glass designs allow sunlight to spill uniquely fascinating patterns of colors and textures into your home. Gorell also offers glass with exquisite V-grooved patterns and etched glass designs.

BETTERVUE™ SCREENS

These unique screens—made of durable, fire-retardant fiberglass yarns—will give you a sharper view of the outdoors. The added airflow you'll get for ventilation is almost like having no screen at all!

SOLARSHINE™

This specialty glass keeps the exterior of your new windows looking clean forever because, remarkably, it uses the sun's rays to loosen and break down dirt from its ultra-smooth surface.

INTERBLINDS™

Amazing "between-the-glass" blinds provide instant privacy, shade, comfort and beauty. They are easy to operate and never require cleaning.

INTERNAL GRIDS

Finely detailed contoured internal grids give windows the look of traditional divided lites, yet allow for easy window cleaning because they're encapsulated between the glass panes.

Give Your Home a Distinctive, Elegant Appearance.

Gorell offers a myriad of options to allow you to truly custom design windows that meet your unique needs and personal preferences. Choose from various color combinations, decorative glass patterns and much more.

COLOR OPTIONS

A palette of beautiful colors allows you to coordinate or contrast your windows to your home—giving your home an all-new ambiance, inside and out. Choose from white or almond interior finishes—and from an unlimited array of exterior color options. You can select one of Gorell's standard exterior colors, or have your windows manufactured in virtually any custom color you request.
