

6100 & 6200 Series
Swing Patio Doors

Elegantly styled doors
for exceptional comfort,
durability and security.

Gorell[®]
WINDOWS & DOORS

Gorell Swing Doors make rooms more comfortable and operate reliably for decades without maintenance.

LOWER YOUR HOME ENERGY COSTS.

You'll immediately notice how comfortable your new Gorell vinyl swing patio door makes the room it's in. Gorell doors are remarkably energy efficient. Of course they help reduce home energy consumption—and that means lower heating and cooling costs. Practically all Gorell patio doors that include a Low-E glass system qualify for the ENERGY STAR® label.

PROTECT YOUR HOME AGAINST INTRUSION.

Doors are typically a home's most vulnerable break-in point, so safety and security are important considerations when choosing one. Gorell 6100 and 6200 swing patio doors feature super-strong frames, heavy-duty locking hardware that incorporates dead bolts in three positions and high-strength tempered safety glass. For even greater protection, consider Gorell's renowned Armor Glass® Plus laminated glass system.*

ENJOY YEARS OF SMOOTH, RELIABLE OPERATION.

Gorell swing doors are built tough for long, dependable operation. They feature strategically positioned metal reinforcement in an exceptionally rigid multi-chambered frame. Gorell doors are also designed so that undue stress isn't placed on the hinge joints. You'll experience years of reliable, no-maintenance operation.

National ENERGY STAR® Partner of the Year every year since 2004. Sustained Excellence Award winner since 2006.

Gorell is proud to partner with the National Crime Prevention Council, offering secure, intruder-resistant windows and doors.

6100-6200 Swing Patio Door

Standard Features

1. Expertly engineered and incredibly durable vinyl frame with multiple structural hollows gives this door exceptional strength and insulating properties.
2. Robotically sealed corners ensure the door stays square—and keep out air and water.
3. The unique multi-point locking system engages concealed bayonet-style locks at the top and bottom of the operating panels for super-tight closure and superb security.
4. Heavy-duty, reinforced door panels are extraordinarily strong to provide unsurpassed durability.*
5. Tempered safety glass helps to protect your family against accidental injury.
6. Premium-grade multiple weather seals make the door more airtight.*
7. Solid, color-matched handles—designed to ergonomically follow the contours of the hand—are elegantly styled and corrosion-resistant to provide years of problem-free operation.
8. Automotive-type glazing adheres the glass to the door panel and creates a seal so tight that outside elements can't get through.*
9. Soft-white vinyl frames feature a silky smooth, clean surface that will look beautiful for decades.

*Feature not visible in photograph.

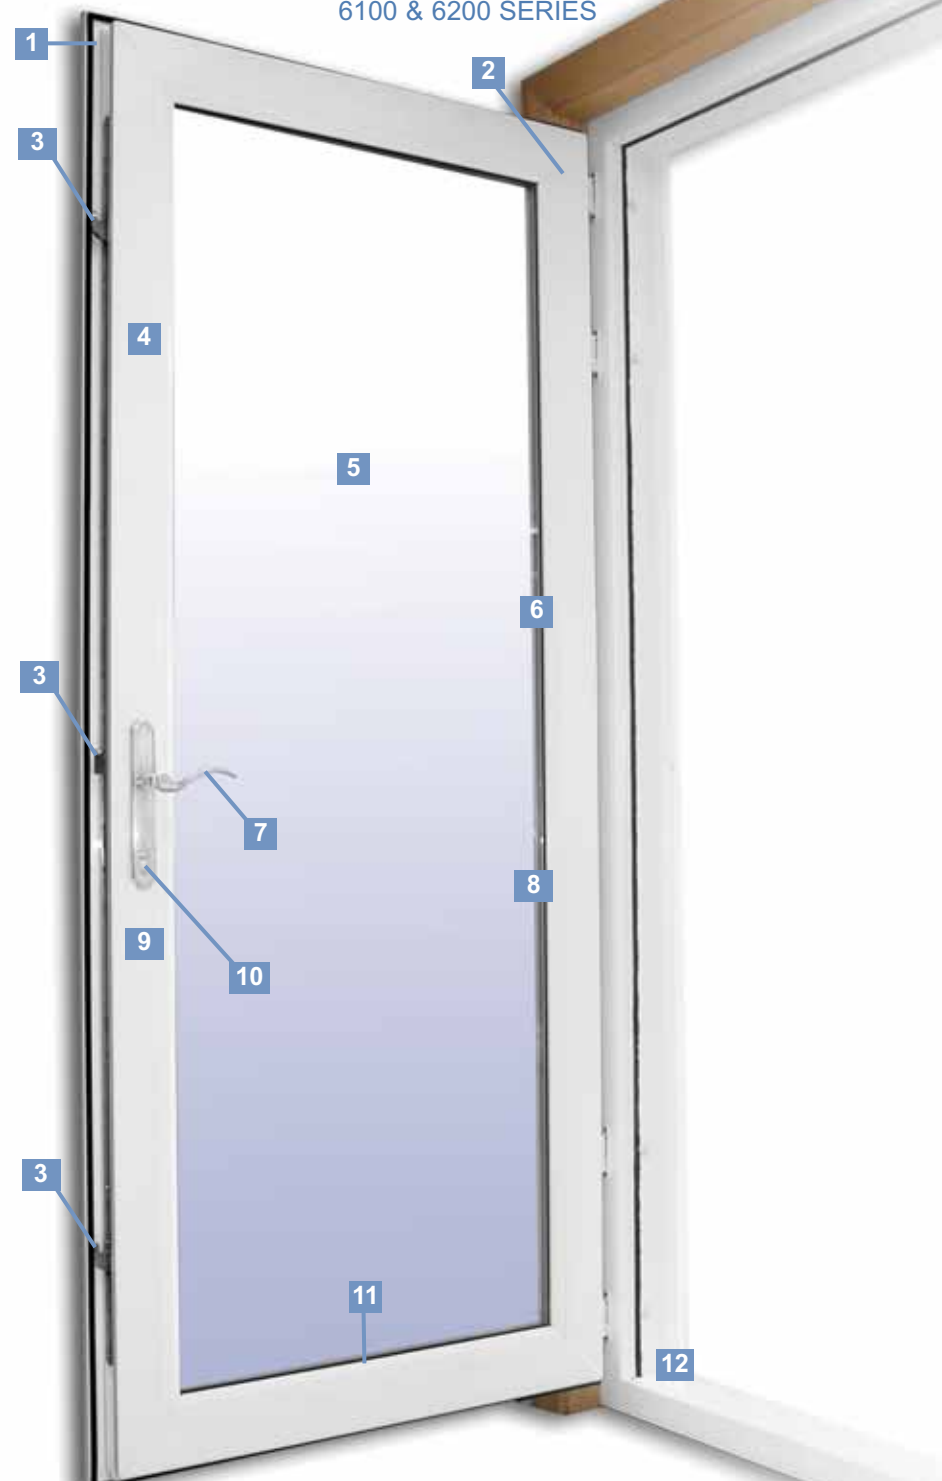

10. Commercial-grade keylock hardware makes your door incredibly strong and secure.

11. Intercept® spacer system offers warm-edge glass technology and is proven to be one of the best systems for ensuring lasting comfort.*

12. 100 percent vinyl screen frames are heat-fused at the corners and top-hung so that they stay on track, operating more smoothly and longer than other screens.*

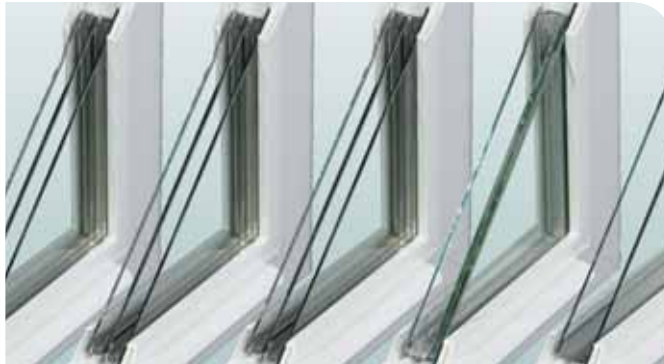

6100 (in-swing) model shown in soft white.

HIGH-PERFORMANCE GLASS SYSTEMS

Gorell offers unique high-performance Low-E glass systems that are designed to provide precisely the level of comfort, thermal performance, security, sound deadening and UV protection you deserve. Practically all 6100 & 6200 doors that incorporate one of these glass systems qualify for the ENERGY STAR® label.

INTERBLINDS™

Amazing “between-the-glass” blinds provide instant privacy, shade, comfort and beauty. They’re easy to operate, provide privacy and never require cleaning.

INTERNAL GRIDS

Finely detailed contoured internal grids give doors the look of traditional divided lites, yet allow for easy window cleaning because they’re encapsulated between the glass panes.

BETTERVUE™ SCREENS

These unique tight-knit screens—made of durable, fire-retardant yarns—will give you a sharper view of the outdoors. The added airflow you’ll get for ventilation is almost like having no screen at all.

SOLARSHINE™

SolarShine almost seems to make exterior glass clean itself. It uses a remarkable process that enables the sun’s rays to actually loosen and break down dirt, which is then easily washed away by the rain.

INTERIOR HARDWARE COLORS

Elegant brass or brushed silver interior lever handles provide additional beauty and sophistication.

SIMULATED DIVIDED LITES

This option allows you to replicate the historical appearance of true “divided-lite” doors to enhance your home’s classic character.

Give Your Home a Distinctive, Stylish Appearance.

The possibilities are endless with the choices Gorell swing doors offer you. They’re available in a wide array of configurations—from our single-door design to popular double French doors—and you can determine whether they swing in or out. 6100 Series doors swing in; 6200 Series doors swing out.

That’s not all. Select from a multitude of stunning options to truly customize your new patio door.

COLOR OPTIONS

Soft white vinyl is standard on 6100 and 6200 Series doors. You can also choose Gorell’s beautiful almond-colored vinyl finish, interior and exterior, for a soft, muted accent to complement the look of your home.
