7100 Series Garden Windows

Garden Windows from Gorell

Introduce more natural light into your home. Grow plants and flowers indoors and at the same time enjoy the beauty of the outdoors. Catch a summer breeze or let fresh air in. Actually make a room feel bigger and more open without knocking out a single wall. All these wonderful things and more are what vinyl garden windows from Gorell do for homes just like yours.

Gorell garden windows are designed and built for both beauty and performance. They keep unwanted moisture and air out because every corner of every frame and sash is fused together to provide a weather-tight seal. They'll look great for years because the durable, maintenance-free vinyl used in making them won't rot, chip or peel.

These products feature screened, side-venting casements that open and close with ease. The top glass panel of every window is perfectly sloped to prevent moisture from collecting. Inside, the bottom section features an insulated seatboard made of Pionite™ that protects against moisture from plants.

7100 Series Standard Features

1. Soft-white vinyl complements practically any architectural style and is pleasing to the eye.
2. Clear double-insulating glass provides better thermal performance than standard single-pane glass.
3. 1/4-inch foam-insulated Pionite/plywood seatboard protects against moisture from plants.
4. Top tempered insulating glass panel is perfectly sloped to prevent moisture from collecting.
5. Externally glazed trapezoid side vents with heavy-duty roto-operator hardware and dual-point locking open and close with ease.
6. Center-fixed window with integral weep system gives you a great view of the outdoors.
7. Heavy-duty screens can be opened easily and quickly removed.

7100 Series Garden Window with two operating sashes.

Gorell Garden Windows are so strong and energy efficient that they meet uniform load structural and air infiltration performance criteria in accordance with AAMA (American Architectural Manufacturers Association) requirements.

GARDEN WINDOW OPTIONS

ALMOND COLOR

vinyl frames and seatboards (clear-through) provide a muted accent you may prefer to complement the look of your home.

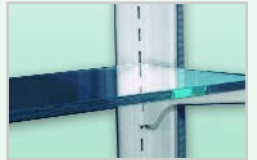

LOW-E GLASS

and argon gas fill help keep your home energy bills lower—and comfort levels higher.

GLASS SHELVES

One or two 3/8-inch adjustable glass shelves are perfect for growing plants or displaying window decorations.

8. Unique vent locking mechanism is easily accessible—toward the inside of the window—to securely lock the vent at two points on each side.

9. Beautifully styled folding handles enhance the appearance of windows and make operation easy.

10. Flexible bulb gaskets around all fixed and operating sash perimeters provide an uninterrupted weather seal.
