

Making homes remarkably comfortable and highly energy efficient

R-Comfort™  
Attic Wrap

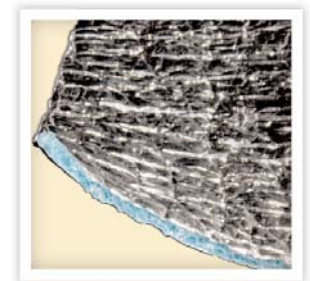

## R-Comfort™ Attic Wrap—Greater comfort, lower home energy costs!

With Gorell's R-Comfort™ Attic Wrap installed over the insulation of your attic's ceiling joists, you'll experience comfortable living like never before—in both cold and warm weather. A by-product of American space technology, this remarkable reflective insulation product will also lower your home energy bills year round because your heating and cooling systems won't run as often.

In cold weather, R-Comfort Attic Wrap prevents heat from escaping and actually reflects it back into your home. In warm weather, its outer facing reflects heat away from your living space to keep your home cooler and more comfortable.

### R-COMFORT ATTIC WRAP:

- Improves the ability of your attic to insulate your home.
- Makes your home more comfortable year round.
- Lowers cooling costs in summer and heating costs in winter.
- Qualifies for the 2010 federal tax credit program.
- Provides a permanent insulating barrier that is puncture-and tear-resistant.
- Installs easily and quickly.
- ENERGY STAR® labeled.
- Passed ASTM 970 Radiant Fire Test.
- Tested to ASTM standards.
- Warranted for 20 years.

# R-Comfort™ Attic Wrap

Made of nontoxic, hypoallergenic components, R-Comfort™ Attic Wrap features a pure aluminum facing that's "flame-laminated" to a unique closed-cell polyethylene insulating material. Even when it's stapled or screwed to your attic joists, R-Comfort Attic Wrap maintains its effectiveness because the closed-cell polyethylene closes up around metal fasteners.

Similar-looking insulation products in the marketplace are not as effective and safe as Gorell's R-Comfort Attic Wrap. Some use flammable adhesives with bubble-wrap, fiberglass or other insulating materials. These radiant barrier products do not yield the high R-values and level of thermal performance that R-Comfort Attic Wrap provides.

R-Comfort Attic Wrap is unique in that it is core-perforated, which provides an effective means for vapor transfer in your attic. Core perforation is a standard feature with this product. Some products in the marketplace that are only micro-perfed are not as effective because the insulating material can close up around the perforations.

When you have R-Comfort Attic Wrap installed on the ceiling joists of your attic, it acts in tandem with your existing insulation to provide high R-values and optimal thermal performance.

R-Comfort Attic Wrap comes in light, easy-to-handle rolls and cuts cleanly and installs easily. This and other R-Comfort products are manufactured for Gorell by Environmentally Safe Products, Inc., a leader in reflective insulating materials for more than 20 years.

**PRODUCT NAME:** R-Comfort Attic Wrap Insulation

**FINISHED DIMENSIONS:** 48" x 125' (standard)

**CORE MATERIAL:** Polyethylene

**FACING:** Foil-perforated

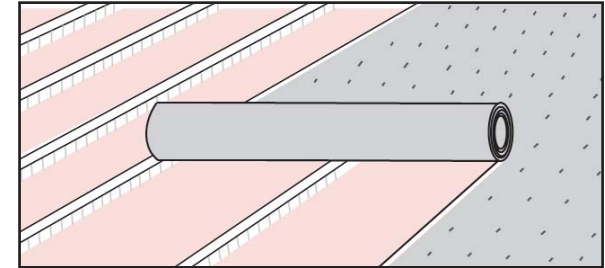

**PERM RATING:** ASTM E - 96: 7, or 40 grams/(day-m2), based on single-sided house wrap.

**FLAME & SMOKE:** ASTM 970 no flame propagation >.12w/cm<sup>2</sup>

**EMITTANCE:** 0.03

**WARNING:** Although R-Comfort insulation products are all ASTM fire tested, it is recommended that they not be exposed to open flame or other ignition sources of sufficient intensity during shipment, storage or installation.

**CAUTION:** Aluminum is an electrical conductor. Please use caution using this product when working around electrical sources.

Gorell R-Comfort Attic Wrap qualifies for the ENERGY STAR® label.

## A Green Future

Gorell works hard to be an environmentally responsible "green" manufacturer. It's our goal to produce the most energy-efficient products available because we recognize the value this brings to you—and to the country. We strive to save energy, safeguard the environment and reduce our carbon footprint. This will help decrease America's dependence on foreign countries for oil and other resources—and help everyone save money.
