Gorell StarView® Windows Make New Homes Comfortable, Energy-Efficient and Beautiful.

StarView® new-construction windows from Gorell are perfect for homes being built today because they help control energy costs, keep homes comfortable all year long, eliminate the need for maintenance and add real beauty—inside and out!

These windows feature all-welded, heavy-duty, multi-chambered frames that are extruded from our special-formula vinyl. We also fusion-weld the nailing fins for added window strength. These are some of the reasons StarView windows will keep your energy bills low and provide year-round energy-efficient comfort.

GORELL STARVIEW NEW-CONSTRUCTION WINDOWS:

- Keep the heat in during cold weather and reflect heat out when it's warm—to lower your home energy costs.
- Operate smoothly and reliably for decades without maintenance—and make window cleaning a breeze.
- Give your home a look of elegance—inside and out—by virtue of their sleek profile and classic design.

Practically all StarView vinyl windows that incorporate a Gorell high-performance glass system qualify for the ENERGY STAR® label.

Gorell is proud to partner with the National Crime Prevention Council, offering secure, intruder-resistant windows and doors.

Standard Features of Gorell StarView® Products

1. Pre-drilled integral nailing fins that make installation easier than ever.
2. Integral J-channels that double as brick molds to make exterior work simpler.¹
3. 7/8-inch insulating glass for the best-possible thermal performance.
4. Gorell Constant Force balance system for fingertip window operation.^{1,2}
5. Locking pivot bar that ensures perfect in-square installation.^{1,3}
6. Durable fiberglass mesh screens that can be removed easily and quickly.^{1,4}
7. Finest quality hardware to ensure long, problem-free window operation.
8. High-strength glazing that provides a superior seal—the stronger the wind, the tighter the seal.¹
9. PPG Intercept® warm-edge spacer system that reduces conducted heat loss through the glass.¹
10. Sloped sills for easy cleaning and a more attractive window profile.^{1,2}
11. Soft-white vinyl—clear-through—that complements practically any architectural style and is pleasing to the eye. (Almond vinyl optional.)

¹ Feature not shown in photograph.

² Single- and double-hung models.

³ Double-hung models.

⁴ Half-screens on single-hung and single-slide models, full screens on double-hung models.

STARVIEW SLIDING WINDOWS

Available in various configurations, including three-lite models, these windows feature lift-out sashes to allow for easier cleaning.

Mulled StarView double-hung (SVDH) windows in soft white and equipped with double-locks.

THE ARMOR GLASS® PLUS SYSTEM

Armor Glass® Plus insulating laminated glass system for excellent security, safety, sound deadening, thermal efficiency and UV protection.

BETTERVUE™ SCREENS

These unique screens—made of durable, fire-retardant fiberglass yarns—will give you a sharper view of the outdoors. The added airflow you'll get for ventilation is almost like having no screen at all!

GLASS SYSTEMS

A variety of glass systems—featuring SolarControl Plus™ Low-E coatings and inert gas fills—will make your new windows ENERGY STAR® qualified and lower your home fuel bills.

DECORATIVE GLASS

Exquisite decorative glass patterns give your home a unique and beautiful look.

INTERNAL GRIDS

Contoured grids suit individual preferences and your home's design.

StarView® Options for Enhanced Performance

- Factory-installed clear pine or pre-primed snap-in jamb extensions to reduce interior work.
- Tempered glass for windows in areas where it's required or recommended for safety.
- Almond vinyl—clear-through—for a less contrasting, more subdued appearance.
- Snap-in drywall returns to make drywall finishing fast and easy.
- Custom sizing to accommodate any window opening.
- Specialty-shapes—including transoms, circle-tops and eyebrows—to accentuate various window and home styles.
- Factory mulling to ensure problem-free installation of multiple-window configurations.

National ENERGY STAR® Partner of the Year every year since 2004.
